Topographical Plan of the French River

Showing the Main Channel to be adapted to a navigation of 20 foot draught with a profile of its water surface, as surveyed by J.W. Fraser in 1901; also its other channels taken from Alex. Murray's surveys of 1847, 55, and 57.

Scale of Plan: 1 Statute mile to an inch.

WATER SURFACE

Vertical scale 10 Feet = 1 inch.

The Sea

Rapids to foot of Dallas Rapid - 60 Feet above Datum

Rapids to foot of Chaudière Falls to foot of Five Mile Rapids 52 feet above Datum

Extreme low water level Lake Nipissing 100 feet above Datum

Water levels are given in feet above Datum.
