An Introduction to NVivo Workshop – Setup

Thank you for registering for this workshop.

Before the workshop begins, please follow the instructions below to prepare:

First set up the software

1. If you don't have NVivo 14 or 15 installed already, follow these [instructions to request a free license key and install the software](). You can use either version, as NVivo 14 and 15 are both identical, except that 15 has released additional AI assistant features. Feel free to reach out using our [contact form]() if you want to learn more.

Next download the datasets

1. Create a new folder on your computer to store the workshop files.
2. [Download a zip file]() containing all the datasets you will need for the workshop to that new folder.
3. Extract the files into that new folder.

Note: Different computers have different setups. On a Mac, just double-click on the file to extract its files.
