Thank you for signing up for the "Introduction to Data Visualization Using Tableau Desktop" workshop.

Before the workshop begins, if you wish to follow along with the demonstrations:

1) Install Tableau Public ahead of time on your computer, as this will not be covered in the session.
2) Download the 3 example dataset Excel files and save them somewhere on your computer where you can find them, such as your Desktop (again, do this ahead of time):
   a. AuthorDataCitationGrants.xlsx:
      https://maps.library.utoronto.ca/workshops/Tableau2022/AuthorDataCitationsGrants.xlsx
   b. AuthorDataExperience.xlsx:
      https://maps.library.utoronto.ca/workshops/Tableau2022/AuthorDataExperience.xlsx
   c. RomeoAndJulietWordFrequenciesByAct.xlsx:
      https://maps.library.utoronto.ca/workshops/Tableau2022/RomeoAndJulietWordFrequenciesByAct.xlsx

If you wish, you can also download the slides, where I include some helpful links where you can learn more: https://maps.library.utoronto.ca/workshops/Tableau2022/Slides.pdf

All the steps that will be covered in the demonstration can be found in this tutorial, if you need to refer back to them during or after the session: https://mdl.library.utoronto.ca/technology/tutorials/tableau-workshop-demonstration-tutorial

If you have any issues with installation or accessing the example datasets, please contact me prior to the session: kelly.schultz@utoronto.ca
